indianmesh

How does it work?

1.Mobile tablets are installed at various touch points in your outlet as Ordering Systems

2.Each ordering device has a Unique Login Code and is connected with your Wi-Fi Internet Connection

3.Your customer will place his order from your restaurant's menu

4.Order Payment can be done through multiple payment modes by the customer viz. cash payments,counter payment,card payments and mobile wallets

5.Order Receipt is printed automatically on the Bar or Kitchen counters via Thermal printers connected through LAN/Wi-Fi connection

6.Orders can be managed and handled in Mink Foodiee Point-of-Sale Order Software by your Managers
